### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Claims Nos.: 6 (incomplete)

### Claim 6:

The subject-matter of claim 6(b) is directed to a polynucleotide which deviates from the polynucleotide sequence specified in SEQ ID NO:1 due to the degeneration of the genetic code. Reference to the degeneracy of the genetic code only makes sense if the peptide for which the polynucleotide is to encode for is defined by its exact amino acid sequence. However, this is not the case in claim 6(b) (no amino acid sequence given). Thus, a reasonable search could not be performed for the subject-matter of claim 6(d) (Art. 6 PCT).

Claim 6c covers any transgenic expression cassette comprising any nucleic acid sequence which has at least 60% identity with the sequence according to SEQ ID NO:1 and having the desired characteristic of increasing the total oil content in a plant. However, the application provides support (Art. 6 PCT) and disclosure (Art. 5 PCT) for only a limited number of such polynucleotides. Thus, a meaningful search over the whole of the scope claimed is impossible. Consequently, the search for claim 6c has been limited to the polynucleotide according to SEQ ID NO:1.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)
This inte	ernational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2. X	Claims Nos.: 6 (incomplete) because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful international Search can be carried out, specifically: see FURTHER INFORMATION sheet PCT/ISA/210
з. 📗	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This Inte	emational Searching Authority found multiple inventions in this international application, as follows:
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.	As only some of the required additional search fees were timely paid by the applicant, this international Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4.	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark	on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

O000053702  International application No.				
International Patent Classification (IPC) or both national classification and IPC C12N15/52  Applicant BASF PLANT SCIENCE GMBH, et al.  1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.  2. This REPORT consists of a total of 5 sheets, including this cover sheet.  □ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which been amended and are the basis for this report and/or sheets containing rectifications made before this Aut (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).				
Applicant BASF PLANT SCIENCE GMBH, et al.  1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.  2. This REPORT consists of a total of 5 sheets, including this cover sheet.  □ This report is also accompanied by ANNEXES, i.e. sheets of the description, claims and/or drawings which been amended and are the basis for this report and/or sheets containing rectifications made before this Autonomous Companied by Administrative Instructions under the PCT).

# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP 03/07084

I.	<b>Basis</b>	of the	report
----	--------------	--------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Description, Pages					
	1-	32	as originally filed			
	C	aims, Numbers				
	1-	11	as originally filed			
2	<ol><li>With regard to the language, all the elements marked above were available or furnished to this Authority in t language in which the international application was filed, unless otherwise indicated under this item.</li></ol>					
These elements were available or furnished to this Authority in the following language: , which is:						
	the language of a translation furnished for the purposes of the international search (under Rule 23.1					
	the language of publication of the international application (under Rule 48.3(b)).					
		the language of a tr Rule 55.2 and/or 55	anslation furnished for the purposes of interpotional prelimination of the purposes of the purpose of			
3.	3. With regard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:					
	$\boxtimes$	contained in the inte	ernational application in written form.			
	$\boxtimes$	filed together with the	ne international application in computer readable form.			
		furnished subsequently to this Authority in written form.				
		— remained eabsequently to this Authority in computer readable form.				
	The statement that the subsequently furnished written sequence listing does not go beyond the disclosuin the international application as filed has been furnished.					
		The statement that the listing has been furn	the information recorded in computer readable form is identical to the written sequence ished.			
4.	The	amendments have r	esulted in the cancellation of:			
		the description,	pages:			
		the claims,	Nos.:			
		the drawings,	sheets:			
5.		This report has been been considered to g	established as if (some of) the amendments had not been made, since they have go beyond the disclosure as filed (Rule 70.2(c)).			
			neet containing such amendments must be referred to under item 1 and annexed to this			
6.	Add	itional observations, i	f necessary:			
	See separate sheet					

## INTERNATIONAL PRELIMINARY **EXAMINATION REPORT**

International application No.

PCT/EP 03/07084

Ш	l. No	n-establishment of opinion t	with re	gard to nov	elty, inventive step and industrial applicability			
	. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:							
		the entire international applic	ation,	•				
	$\boxtimes$	claims Nos. 6 (partially)		,				
		because:						
	-	the said international application not require an international p	ion, oı relimin	the said clai ary examina	ims Nos. relate to the following subject matter which does tion (specify):			
	the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):							
,		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinior could be formed.						
	$\boxtimes$	no international search report	has b	een establish	ned for the said claims Nos. 6 (partially)			
<ol><li>A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:</li></ol>								
		the written form has not been	furnis	hed or does i	not comply with the Standard.			
					ned or does not comply with the Standard.			
٧.	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement							
1.	State	ement

## INTERNATIONAL PRELIMINARY Inter EXAMINATION REPORT - SEPARATE SHEET

### Citations

The documents mentioned in this International Preliminary Examination Report (IPER) are numbered as in the International Search Report (ISR) dated 27.10.03, i.e. D1 and D4 correspond to the first and the last document of the search report, respectively. The ISR has been established by this authority.

## Re ITEM I (Basis of the opinion)

The application as filed contains a sequence listing consisting of 6 pages (2 sequences).

## Re ITEM III (Non-establishment of opinion)

No search report was established for the subject-matter of <u>claim 6b and c</u>. Consequently, preliminary examination has not been carried out for said parts of <u>claim 6</u> (Rule 66.1(e) PCT). The International Preliminary Examining Authority (IPEA) agrees with the objection put forward by the International Searching Authority (ISA):

The subject-matter of <u>claim 6(b)</u> is directed to a polynucleotide which deviates from the polynucleotide sequence specified in SEQ ID NO:1 due to the degeneration of the genetic code. Reference to the degeneracy of the genetic code only makes sense if the peptide for which the polynucleotide is to encode for is defined by its exact amino acid sequence. However, this is not the case in <u>claim 6(b)</u> (no amino acid sequence given). Thus, a reasonable search and examination could not be performed for the subject-matter of <u>claim 6(b)</u> (Art. 6 PCT).

<u>Claim 6c</u> covers any transgenic expression cassette comprising any nucleic acid sequence which has at least 60% identity with the sequence according to SEQ ID NO:1 and having the desired characteristic of increasing the total oil content in a plant. However, the application provides support (Art. 6 PCT) and disclosure (Art. 5 PCT) for only a limited number of such polynucleotides. Consequently, search and examination for <u>claim 6c</u> have been limited to the polynucleotide according to SEQ ID NO:1.

Re ITEM V (Novelty, inventive step, industrial applicability)

### INTERNATIONAL PRELIMINARY International application No. PCT/EP 03/07084 **EXAMINATION REPORT - SEPARATE SHEET**

#### 1 Novelty (Art. 33(2) PCT)

The subject-matter of claims 1-11 has not been made available to the public by any of the available prior art documents and can therefore be regarded as novel.

- 2 Inventive step (Art. 33(3) PCT)
- The subject-matter of claims 1-11 cannot be derived from the available prior art in an obvious manner and therefore complies with the requirements of Art. 33(3) PCT.
- 2.2 The polypeptide disclosed in D4 (P47139) is 100% identical in 655 amino acids overlap to the sequence set forth in SEQ ID NO:2 of present application.
- 2.3 The nucleotide sequence disclosed in D3 (Z49598) is 100% identical in 2251 nucleotides overlap to the sequence set forth in SEQ ID NO:1 of present application.
- 2.4 However, said documents do not disclose or make obvious an expression cassette according to independent claim 5 or a method according to independent claim 1.
- Industrial application (Art. 33(4) PCT) 3

Claims 1-11 meet the criteria as set forth by Art. 33(4) PCT.

#### Re ITEM VIII (Certain observations on the international application)

- The expression "a polypeptide SEQ ID NO:2" is unclear (e.g. independent claim 1  $\underline{1}$ ). The claim does not refer to "a yeast polypeptide consisting of the amino acid sequence as set forth in SEQ ID NO:2". The same objection applies to e.g. independent claim 5 ("a nucleic acid sequence SEQ ID NO:1").
- Since the function of the polypeptide is not stated in claim 1 or 2, the term 2 "functional equivalent" used in claim 2b makes no sense. The function of the polypeptide is not stated in the independent claims.
